

Visualizing Data for Non-Data Experts

Making Reports Accessible

Valerie Junk

Valerie Junk

- Data Analytics & Visualization
- Data Storytelling
- Process Improvement
- BI Standardization

Accessibility

- Design
 - Simple but informative
 - Action driven
 - End-user oriented
- In combination with accessibility features
 - Keyboard navigation
 - Tab order
 - Screen reader
 - Alt text
 - Contrast & Colour blindness

Perfect report...

.. the audience just doesn't get it!

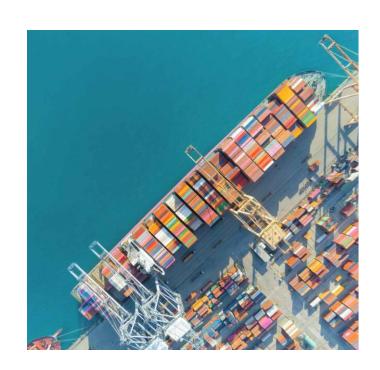

Not designing for the audience

A real example

Vessel tracking

- Loading time
- Start time
- Time of arrival
- Unloading

Need: Efficiency report

Not designing for the audience

A real example

Huge amounts of data

- GPS by second
- Vessel data
- Weather & current data
- Load/Unload data

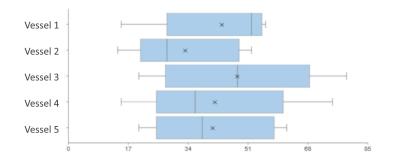

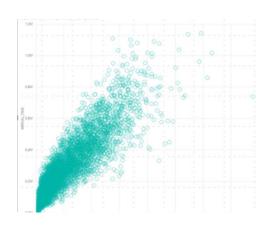

Data Science to the rescue

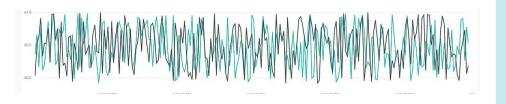

The result

- 25-page report
- No titles and descriptions
- Up to 40 vessels in one visual
- Countless filters

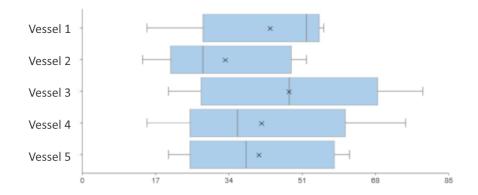

The End-user

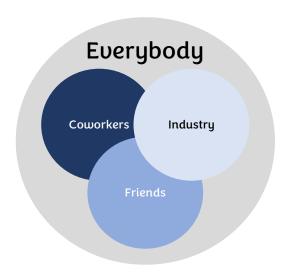

Vessel 3 won!

Everybody knows fallacy

Everybody else

Design for the audience

- Who is the audience?
- What is their level of experience?
- How are they going to use the report?
- How much detail do they need (and understand)?
- What actions do they want to take?

Asking Questions

- Provide examples
- Ask what actions they expect to be able to take
- Ask about prior experience (& check)

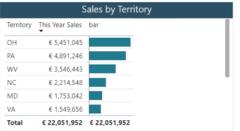

Visual = Goal + end-user

- Goal (actions to take) & end-user determine the visual.
- Same data can be visualized in different ways.

Small changes - huge effect

Meaningful (Sub)titles

- Provide context
- Provide first insights
- Guide the end-user
- End-users don't need to analyse themselves

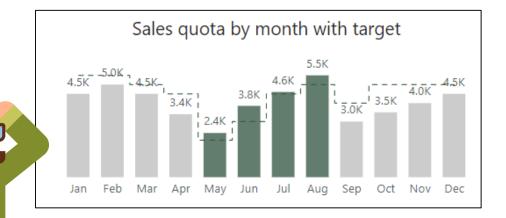

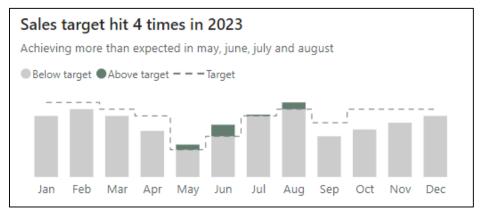

Adding Context

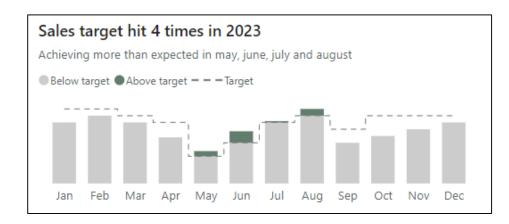

Legend and colour coding

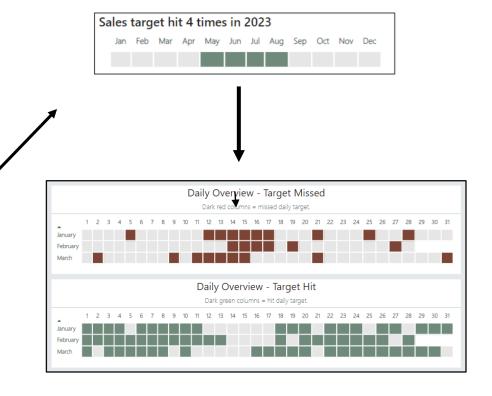

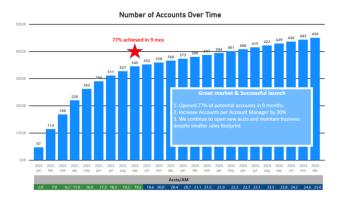

Simplify

Don't overestimate the time the users is willing to spend to find information.

Accessibility

- Design
 - Simple but informative
 - Action driven
 - End-user oriented
- In combination with accessibility features
 - Keyboard navigation
 - Tab order
 - Screen reader
 - Alt text
 - Contrast & Colour blindness

Keyboard navigation

All elements can be navigated using keyboard shortcuts

- **Shift** + ? = Overview shortcuts
- Ctrl + F6 = Move between sections
- Ctrl + Shift + F11 = Show visuals as tables
- Enter = Enter/Exit a visual
- **Ctrl** + **Space** = Multi-select data points

Tab order

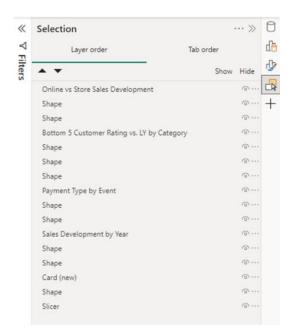

- Seemed Random
- Shapes selected
- Title (text inside shape) not selected

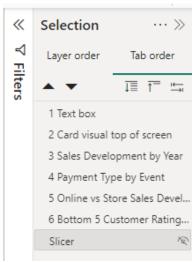

Changing the tab order

- View Selection Tab order
- Importance of naming elements
- Hide everything you don't want to use

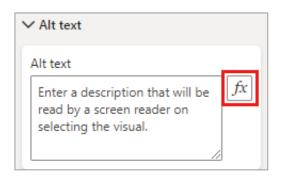

Screen Reader - Alt text

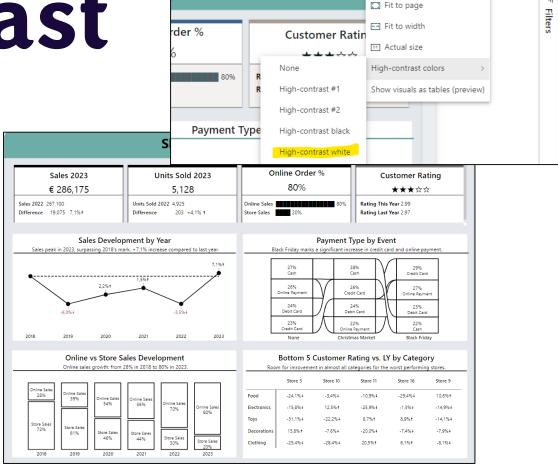

- For all elements
- Read by screen readers
- Meaningful information about the element
- Max 250 characters
- Use DAX to make it dynamic

High Contrast

vsis

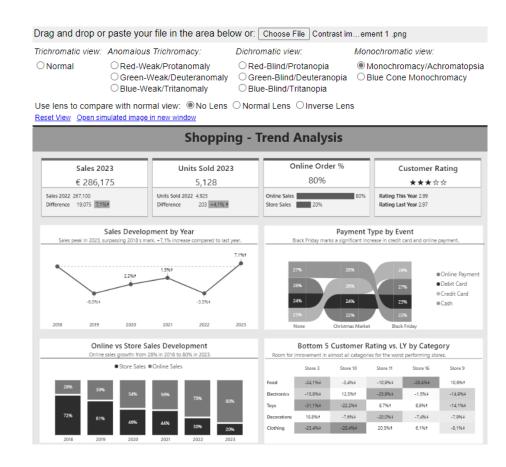

Full screen

C 🖵 🏠

Color check

- https://www.color-blindness.com
- Squint test
 - Turn down the brightness of screen
 - Do you still see the most important information?
- Check with the end-user

Takeaway

- Design for the audience
- Goal & End-user = Visual
- Provide context & meaning
- Accessibility is important
- Keep it simple
